## International application No. PCT/NL03/00470

Reference is made to the following documents:

D1: US-A-3 205 837 (FAY RUDOLPH J) 14 September 1965 (1965-09-14)

D2: US-A-4 212 609 (FAY RUDOLPH J) 15 July 1980 (1980-07-15)

2. The present application does not meet the requirements of Article 33(2) PCT, because the subject-matter of claim 1 and 8 is not new. The reasons being the following:

- 2.1. Document D1 (column 1 lines 20 to 24, column 1 lines 36 to 54, column 2 line 43 to column 3 line 6), which is considered to represent the closest prior art, discloses all the technical features of present independent claims 1 and 8, in particular it discloses a way to eliminate simultaneously the adhesion forces between the mould and the product, namely with air (see also column 3 lines 1 to 20).(cf. claims 1 and 8)
- 2.2. From the above it appears that all the features of claims 1 and 8 are known from document D1 at least by implication and said claims, theirs subject matter lacking novelty, are hence not allowable
- 2.3. Moreover also document D2 (column 1 lines 24 to 57, column 2 lines 3 to 15, column 4 lines 26 to 41) discloses all the technical features of present claims 1 and 8.
- The dependent claims are only allowable when related to a patentable independent claim. In the present case, the dependent claims merely concern preferred embodiments of the invention which do not contain any features which meet the requirements of the PCT in respect of novelty or inventive step.

Should the applicant nevertheless regard some particular matter as patentable, an independent claim should be filed taking account of Rule 6.3 PCT. The applicant should also indicate in the letter of reply the difference of the subject-matter of the new claim vis-àvis the state of the art and the significance thereof.

4. The applicant is requested to file amendments by way of replacement pages in the manner stipulated by Rule 66.8(a) PCT. In particular, fair copies of the amendments should be filed preferably in triplicate.
